The First Flowers of Spring

Scilla campanulata, Mixed
12 for 70¢; 100 for \$5.00.

Scilla Sibirica, Blue
12 for 75¢; 100 for \$5.50.

Crocus, Mixed Colors
12 for 70¢; 100 for \$5.00.

The early spring flowers have a charm and appeal all their own. Though they are not large, they seem to mean so much to us because they are the first ones to greet us, often before the snow is gone.

Scilla campanulata

(Wood Hyacinth or Spanish Blue Bell)

9495 Mixed Colors Erect flower-spikes, about 15 in. high, with beautiful blue, pink and white Bellflower-like blooms during May and early June. Will grow in sun or shade, even under trees, but do best in partial shade in good rich soil. Set bulbs 3 in. deep and 6 in. apart. Ideal for naturalizing in rock gardens and borders.

12 for 70¢;
100 for \$5.00; 250 for \$11.75.

Scilla Sibirica

(Blue or Siberian Squill)

9490 Blue Charming, small blue flowers on graceful spikes, 3 to 4 in. high. Extremely hardy, flowering very early in the spring. Fine for naturalizing in borders or rock gardens. Do well everywhere—in full sun, half-shade or shade. Most effective if planted in masses. Plant bulbs 2 to 3 in. deep and 3 in. apart.

12 for 75¢;
100 for \$5.50; 250 for \$12.75.

Crocus

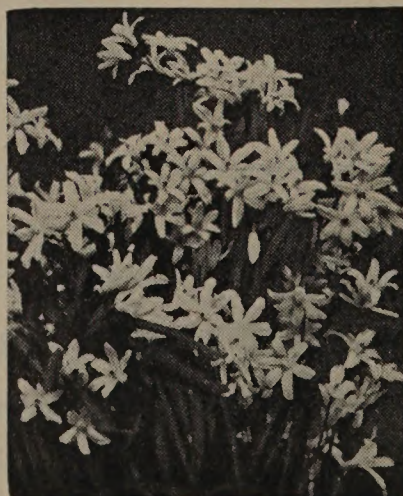

SPRING FLOWERING

9542 Mixed Colors White, yellow, blue, purple and striped in mixture. Crocus will grow in many places—in the lawn, flower borders, in rock gardens, edge of shrubs, on the slopes of terraces, in sun or shade, and even under trees. The best position is where they will receive the sun for only part of the day. For showy effect plant bulbs 3 to 4 in. apart, 2 in. deep. The soil should be rather dry; they will not flourish in heavy, wet soil. Rich soil is not necessary, but will prove beneficial.

When planted in the lawn, select a place where the grass need not be cut until the foliage of the Crocus has matured. This is essential if flowers are wanted in future years. To avoid formal arrangements, scatter the bulbs on the lawn and plant them where they fall. In borders, bulbs should be planted about 3 inches apart, and for mass effect in double rows 6 inches apart. Such ribbon plantings are very pretty.

12 for 70¢;
100 for \$5.00; 250 for \$11.75.

Does best in a sheltered, shady location in light, loose, well-drained soil; it can be fairly damp but must not be wet. Plant bulbs 2 to 3 in. deep and 4 to 5 in. apart. (Glory of the Snow)

Calochortus

(Mariposa or Butterfly Tulips)

(See colored illustration on second cover.)

"Mariposa" means **butterfly** in Spanish and is applied to these Tulips because the "eyes" and markings on the gorgeously colored flowers are so much like those on the wings of a butterfly. Flowers are cup-shaped and of wonderful colors, many marked with dots and pencillings. They are borne one or more to a stem during May and June. Bulbs are small and should be planted 2½ to 3 in. deep and 3 to 6 in. apart. In cold sections give bed a surface covering of several inches of straw or strawy manure after the ground has become frozen.

9382 Clavatus The bowl-shaped blooms, often over 4 in. across, are deep golden yellow without markings, the lower half being covered with stiff yellow hairs. The largest flowered, stoutest stemmed Mariposa Tulip. 3 for 40¢; 12 for \$1.40; 100 for \$10.00.

9384 Luteus Lemon-yellow to cream and white; finely penciled.

Grape Hyacinths

(Muscari)

Little spikes closely set with small, round bells which resemble a miniature inverted bunch of grapes. They do well in edgings, in clumps in the borders or rock gardens, under trees, and in the wild garden if grass is not too rank. 6 in. high. Bloom in April. Plant bulbs 3 to 4 in. apart and 2 to 3 in. deep. Perfectly hardy; may be left undisturbed for years.

9575 Armeniacum Giant, fragrant flowers of deep cobalt-blue. 12 for 70¢; 100 for \$5.00; 250 for \$11.75.

Grape Hyacinth, Heavenly Blue
12 for 65¢; 100 for \$4.50.

Camassia

(Indian Lily)

9381 Leichtlini Do well under ordinary garden culture. Excellent for naturalizing in open, moist locations. May be left undisturbed for years. Hardy without protection. Blooms in late May and June. The flower-spikes grow 2 to 3 ft. high, and bear many star-shaped flowers 1½ in. across in shades of blue, ranging from lavender-blue to deep purplish blue. Plant bulbs in masses, 4 in. deep and 4 to 5 in. apart for best effect. 3 for 30¢; 12 for \$1.00; 100 for \$7.50.

Calochortus

(Globe Tulips)

Often referred to as Fairy Lanterns; the shape of the flowers and the way they hang on the stem suggest the name. Plants are much branched and bear a number of exquisitely tinted flowers on long, leaf-wrapped stems. Globe Tulips are natives of woodlands, so should be planted in any friable soil mixed with plenty of leaf mold. They like some shade but not full shade. Fine subjects to naturalize in the rock garden or in shaded woods, but they must have perfect drainage. Plant bulbs 2½ to 3 in. deep and 3 to 6 in. apart. In cold sections, provide winter protection after ground has become frozen. Bloom in May and June.

9376 Albus White with some bronze and pinkish tinging. 18 to 30 in.

9377 Amabilis Bright canary yellow, a popular color. Up to 15 in. high.

9378 Amoenus A delightful shade of soft rose-pink. 8 to 16 in.

BULBOUS IRIS

A glorious display of blue, white, bronze, and yellow flowers in June if you plant the bulbs of these beautiful Iris early in the fall. Flowers are suggestive of Orchids. Bulbs, for best results, should be planted early (September or October) in well-drained, sandy loam, 3 to 4 in. deep and 6 in. apart. In cold climates, mulch ground well after it is frozen. It is their nature to root early and often make top growth in December.

Dutch Iris Flowers are larger, broader; and the falls usually wider apart than the Spanish type; they come into bloom one to two weeks earlier. Beautiful in the garden; lovely for cutting. Valuable for greenhouse forcing.

Do best in a shady location and in moderately rich soil. Fine for cutting. Not reliably hardy north of Washington, D. C., except in warm, sheltered locations. Splendid for growing in frames or pots. The roots resemble tiny clumps of Dahlias. Set them, claws downward, 2 in. deep and 4 to 6 in. apart. They delight in semi-shade and are lovely for the rock garden and do well under oak and deciduous trees. Plant bulbs 2 to 3 in. deep and protect in cold sections. May also be grown indoors in pots. 3 for 25¢; 12 for 70¢; 100 for \$4.75.

Erythronium, Mixed Colors

The shape of the roots gives them the common name of *Dog's Tooth Violets*, while the mottling of some leaves gives them also the name of *Trout Lilies*. (See colored illustration on second cover.) 3 for 25¢; 12 for 75¢; 100 for \$5.25.

Brodiaea, Mixed Colors
3 for 25¢; 12 for 70¢; 100 for \$4.75.

Narcissus or Daffodils

*King Alfred
Daffodil*

(See colored illustration
on front cover.)

3 for 40¢; 12 for \$1.40; 100 for \$10.00.

In a general way, Daffodil and Narcissus mean the same thing; Daffodil is the common name and Narcissus, the botanical name. Common usage among garden makers in this country has applied the term Daffodil to the giant trumpet varieties, while the smaller or medium trumpet, as well as the Cluster-flowered and Poet's types, are referred to as Narcissus. Botanically these smaller or medium trumpet Daffodils are the Barrii, Incomparabilis, Leedsii, Poeticus, Poetaz, Polyanthus and Miniature types.

Some gardeners apply the name Jonquil to the giant trumpet Daffodils, but this is misleading, as Jonquils are small flowered, sweet scented, have foliage of about the same thickness as width (rush-leaved). Other Narcissus have flat or grass-like leaves.

We are listing the different classes separately, describing the distinguishing characters of each, and in so doing hope it will be of some help to you in selecting the varieties you want in your garden.

As Narcissus bloom early, last a long time, and may be had in so many lovely varied forms, they have few equals as garden flowers. They are most desirable for any garden purpose—in masses in beds or borders, in groups of 12 or more here and there in the hardy perennial border, or in the foreground of shrubbery. For naturalizing in large quantities, no other flower is more suitable. Narcissus are also ideal, easily grown subjects for winter blooming in the house.

How to Grow Daffodils

Outdoors: For best results plant bulbs as early in the fall as possible, 4 to 8 in. deep and 6 to 10 in. apart; the exact distances depend on the size of the bulb and the nature of the soil. In very cold locations, after the ground is frozen hard, cover with leaves, straw or coarse litter to a depth of 4 to 6 in.

Indoors: Put several bulbs, about 1 in. apart (same variety), in a pot, barely cover the bulbs with soil, water thoroughly, and put in a cold-frame or heel-in in the garden for 8 to 10 weeks to force root development before bringing indoors for winter blooming.

Medium Trumpet Daffodils

On this and the next page we offer a choice assortment of Daffodils whose trumpets are not so long as the perianth segments. In this group, where the trumpet is greatly reduced in size and cupped, we refer to it as a "cup"; where trumpet is shortened but expanded or broadened, we call it a "crown."

The Medium Trumpet class is divided into three groups—Incomparabilis, Leedsii and Barrii. These divisions are based mainly on the relation of the perianth to the trumpet, crown or cup; an explanation is given under each group as to their distinguishing characters.

Barrii Daffodils

In this group, the cup or crown measures less than one-third the length of the perianth segments. For this reason they are often referred to as "Short-cupped Daffodils." They include varieties with yellow perianth and yellow cup, with or without red coloring on the cup, as well as varieties with white or whitish perianth and self-yellow, red-stained, or red cup. The most brilliant red crowned or cupped varieties will be found in the Barrii group.

9424 Alcida Giant flower, pure white perianth, and wide citron-yellow cup edged orange. Free blooming. Showy and attractive. 20¢ each; 3 for 55¢; 12 for \$2.00; 100 for \$14.00.

Jonquils and Campernelles

Jonquils and their hybrids have a grace and charm that make them extremely popular. They are a distinctive type of Narcissus, the flowers being small, delightfully scented, and usually borne in clusters of two or more on strong stems. Some varieties produce their much prized blooms above the erect and rush-like foliage, while others are about level with the tops. They are perfectly hardy in the garden and highly recommended for beds, borders, naturalizing in woodlands, rock gardens, etc.; valuable for indoor culture in pots. Ideal for cutting, as the little flowers are of the greatest substance, keeping in perfect condition for a long time. Some gardeners apply the name "Jonquil" to the large trumpet Daffodils, but this is misleading. They are entirely distinct.

9479 Single Jonquil (See colored illustration on third cover.) The true Jonquil with the fragrance of the honey locust. 3 to 8 rich golden flowers to a stem. 3 for 25¢; 12 for 85¢; 100 for \$6.00.

9565 Tullius Hostilius New type of Jonquil hybrid; flowers as large as some of the smaller sized trumpet varieties. Of the Jonquil-yellow trumpet type, with usually three flowers to a stem which are produced in the greatest profusion. They are perfect in every respect. An ideal variety for garden display, house culture or cut-flower use. 18¢ each; 3 for 45¢; 12 for \$1.50; 100 for \$10.50.

9483 Golden Sceptre One of the finest of the new Jonquil hybrids. Flowers are deep Jonquil-yellow, 3 in. or so across. The perianth is star-shaped, just a shade lighter in color than the trumpet, which is slightly rolled and flaring at the brim. Ideal for garden and cutting. 3 for 30¢; 12 for 90¢; 100 for \$6.75.

9468 Giganteus Campernelle The largest flowering of all Campernelles. The deep yellow, fragrant flowers are borne freely in clusters of impressive size. Early blooming and a favorite for all purposes. 3 for 35¢; 12 for \$1.15; 100 for \$8.00.

9469 Orange Queen Campernelle Very striking, intense golden orange flowers with prettily fluted cup; 2 or 3 fragrant blooms are borne to a stem. 3 for 30¢; 12 for \$1.00; 100 for \$7.50.

9463 Single Campernelle Each stem carries from 2 to 5 large, rich, deep yellow flowers which are delightfully fragrant. Lovely in every way; very effective in beds and ideal for cutting. 3 for 30¢; 12 for 90¢; 100 for \$6.50.

9482 Double Campernelle A very charming variety, bearing, on tall, graceful stems, 2 or more double, deep yellow flowers of great substance; last long in the garden or when cut. 3 for 30¢; 12 for 95¢; 100 for \$7.00.

Paper White Narcissus
12 for 60¢; 100 for \$4.25.

Polyanthus Narcissus

The popular flower for growing in the house during the winter and early spring, either in soil or in pebbles and water

One of the easiest flowers to grow. Best results are obtained if your first plantings are not made until after October 15. To have a continuous display, make successive plantings two or three weeks apart. We suggest you order enough bulbs early, as they will keep in perfect condition if put in a cool, dry cellar or spare room until needed for planting.

Water Culture: Put an inch or two of sand or pebbles in bottom of dish; set the bulbs upright and place sufficient pebbles around them to hold them in place. Fill dish with water and set in a dark, cool room until plenty of roots have formed, after which bring to a light but cool, free from frost, place.

Polyanthus Narcissus may also be grown in soil. **They are not suited to garden planting** except in frostless localities.

9460 Paper White Grandiflora

The Fragrant White Narcissus

The large, pure white blooms are borne in clusters and are highly prized for their beauty, fragrance, and the ease with which they can be grown. This accounts for their universal popularity. (See colored illustration on second cover.)

LARGE BULBS: 12 for 60¢; 100 for \$4.25; 1000 for \$38.00.

9459 Soleil d'Or—Golden Yellow Narcissus

LARGE BULBS: 3 for 40¢; 12 for \$1.25; 100 for \$9.00.

Giant Triumph Tulips

A rather new group of Tulips with large, well-formed, Darwin-like flowers on tall, strong stems. They come into bloom just ahead of the Darwins, thereby providing a longer display of Tulips in the garden. This is of considerable value, especially this year, when we cannot supply any of the Early Single Tulips. In addition, colors and color combinations are seen in Triumph Tulips that are not seen in other classes. While Triumph Tulips may be forced, we do not recommend them for house culture. Often referred to as "Early Darwins."

Tall Giant Darwin Tulips

The chief characteristics of Darwin Tulips are the perfect cup-shaped flowers, fleshy petals, tall stems, and lovely colors—scarlet, crimson, rose, pink, violet, purple, slaty blues, blue-violet, lavender, white and golden yellow. They are wonderful for planting in masses in beds or borders, in clumps of 12 or more here and there in the hardy perennial border, or in the foreground of shrubbery, and what could be lovelier for cutting?

For a full range of colors in late Tulips, the Darwin, Breeder and Cottage varieties should be included in your plantings, as each class has its own range of colors, and all three bloom at approximately the same time. The height given for each variety is average, and some variation is natural in different localities and seasons.

Cottage or May Flowering Tulips

Dido

3 for 30¢;
12 for 95¢;
100 for \$7.00.

Cottage or May Flowering Tulips are, perhaps, the most permanent of all Tulips, blooming in early May after the Giant Triumphs have passed, hence the name, "May Flowering." The term "Cottage" is of recent origin, and so called because so many were planted around the country homes and cottages of England. As a class, they are rich in the more delicate and artistic shades of yellow, orange, fawn, salmon, old rose—colors missing to a great extent in other late Tulips.

Cottage Tulips are as varied in their range of colorings as the Darwins but different in form, being mostly long and oval-shaped, many with gracefully reflexed petals. Stems are long and not so stiff as the Darwins or Breeders. Excellent for cutting and unsurpassed for garden decoration and especially for grouping among shrubbery. Except for a few varieties, they are not recommended for growing indoors.

Heights given are average and may change according to locality and season.

9322 Advance Brilliant scarlet flushed orange on outside of petals; inside fiery red with blue base. Giant flowers with very long petals; strong, tall stems. As its name implies, it blooms well in advance of other late Tulips. 24 in.

3 for 55¢; 12 for \$2.00; 100 for \$14.00.

9237 Albino (See colored illustration on back cover.) Large pure white flowers with ivory colored anthers. Nice if planted alone or in combination with other varieties. Fine for cutting. 22 in.

Giant Breeder Tulips

Breeder Tulips are of the same tall, stately growth as the Darwins, require the same culture, bloom at about the same time (during the month of May), but come in colors not found in that or any other class of Tulips. Their rich and unusual blendings of purple and old gold, bronze and terra-cotta, brown and violet, buff and maroon, are most attractive. These so-called "art shades" put Breeders in a class by themselves. Enormous, graceful, showy blooms, many of them sweet-scented. All are splendid for cutting and should be included in every garden display. They begin to flower when the Giant Triumph Tulips are going off. Heights given for each variety are average; they may vary in different localities and seasons.

Burpee's American Grown Bulbs

All bulbs listed in this catalog, with the exception of a few varieties of Lilies, are American Grown. Nearly all are ready for delivery after the middle of September, and all hardy varieties can be planted outdoors any time from then on until the ground freezes hard. Daffodils, however, will do better if planted before the ground freezes.

Short cultural directions are given in this book; more complete directions are printed on the bags containing the bulbs. It is easy to grow beautiful flowers from Burpee's American Grown Bulbs. Supply of some is limited, so order early.

Hardy Garden Lilies

Fall is the best time to plant Hardy Lily Bulbs. They are usually ready in late November or early December. If you live in a locality where the soil freezes up early, prepare your bed, cover with manure, leaves or straw to prevent freezing until bulbs arrive, and then plant promptly. After planting the bulbs, do not put back the manure, etc., until the ground has frozen. Lily bulbs differ greatly in size according to variety; when planting, cover bulbs to the depth of three times their diameter. We do not recommend Hardy Lily bulbs for house culture.

Easter Lilies

Popular throughout the world, loved and admired by everyone. We offer three varieties that are *ideal for indoor growing*—Harrisii, Longiflorum giganteum, and Erabu. Use a 5- or 6-in. pot; place bulb loosely in rich, porous soil so that it is barely covered and the soil gently but firmly set. Keep in a cool, dark but airy place, free from frost, until bulbs are well rooted; afterward bring to the light and grow on in a temperature of not more than 60°. Ideal garden subjects in frost-free locations.

8614 Erabu (Japanese Easter Lily)

Improved type of the well-known *Lilium Formosum*, with uniform dark-colored stems. Often called "Black-stemmed Formosum." Plants are of healthy, strong growth, about 3 ft. high, and bear their magnificent flowers in whorls at the top of the strong stems. Flowers are large, trumpet-shaped, 6 to 8 in. long, pure waxy white and sometimes tinged with green near the base; the anthers are yellow, which adds to the beauty of the blooms.

Erabu Lily is largely grown for Easter forcing, having practically replaced the old Formosum. They are delightfully fragrant, and if cut when partially open, can be kept for two weeks. Gets its name because nearly all of the bulbs are grown in the Erabu Isles. Usually ready in October.

30¢ each; 3 for 80¢;
12 for \$2.75; 100 for \$20.00.

Bermuda Easter Lily

Large bulbs: 30¢ each; 3 for 85¢.
Extra large: 50¢ each; 3 for \$1.40.

Bermuda Easter Lily

(*Lilium Harrisii*)

Quick to come into bloom; may be forced for Christmas, but it is for Easter that it is so extensively planted. The plants grow about 3 ft. tall and produce 5 to 12 or more large, trumpet-shaped, fragrant, waxy white blooms with contrasting yellow anthers. Generally ready for delivery from August to December.

8602 LARGE BULBS: As a rule, they produce 5 to 10 large flowers per plant. 30¢ each; 3 for 85¢; 12 for \$2.95; 100 for \$22.00.

8601 EXTRA LARGE BULBS: Will produce more flowers per stem. 50¢ each; 3 for \$1.40; 12 for \$5.00; 100 for \$37.00.

Giant Easter Lily

30¢ each; 3 for 85¢; 12 for \$2.75.

8612 Giant Easter Lily

(*Lilium longiflorum giganteum*)

The flowers are of the purest white and the largest of all Easter Lilies. The plant is of sturdy, stocky growth and largely forced for Easter, but is just as valuable for later flowering. We handle the "Northern or Saitama grown" bulbs, as we consider them the best. Usually ready for shipment in November.

30¢ each; 3 for 85¢;
12 for \$2.75; 100 for \$20.00.

The bulbs offered on this and the previous page are not hardy, so must be grown indoors except in frost-free locations. With the exception of a few varieties of Lilies, all bulbs listed in this book are American grown.

Perennial Flower Seeds

Perennial Flowers are the hardy, permanent ones that live for years. In frost-free sections, seeds may be sown at almost any time of the year; in mild climates or in localities where winters are not too severe, seeds may be sown in the fall—the earlier the better, so that plants will be of good size before freezing weather sets in. After the ground is frozen hard, cover the bed with a light mulch of straw or strawy manure to prevent the plants from being heaved out by alternate freezings and thawings. Cultural directions are given on every bag. The Burpee leaflet, "Perennials from Seed," sent **Free** upon request.
